AJAY V A

Python Developer | AI/ML Engineer

Abu Dhabi, UAE +971 0562124850

ajayvanil27@gmail.com • LinkedIn • GitHub

PROFESSIONAL SUMMARY

Python Developer with nearly 2 years of experience building production backend systems and AI-powered applications. Experienced in Python, FastAPI, Django, Frappe, REST APIs, SQL, and MongoDB, with hands-on experience developing LLM applications and AI workflows using LangGraph. Worked on resume processing, candidate screening, document processing, and event-driven systems using Google Cloud. Strong foundation in Machine Learning, Computer Vision, and NLP.

WORK EXPERIENCE

AI Engineering Intern — *Kruit AI* **— Jul 2026 – Sept 2026**

- Contributed to the development of an AI-powered recruitment platform for automated resume processing and candidate screening.
- Developed backend and AI workflows using Python, FastAPI, LangChain, LangGraph, and MongoDB.
- Worked on resume processing, workflow automation, service integrations, testing, debugging, and production deployments in collaboration with the technical team.

Python Developer — *Faircode Infotech* **— Oct 2024– Jan 2026**

- Built and maintained production REST APIs for the Ship Design Approval System, supporting reliable data exchange across departments.
- Designed multi-stage approval workflows with role-based access control, status tracking, and automated notifications.
- Optimized Frappe ORM queries and backend logic to improve API performance and maintain scalable, production-grade code.
- Automated report generation using Python, Pandas, and python-docx, reducing manual effort and standardizing document outputs.

Machine Learning & AI Intern — *Gofreelab Technologies* **— Jun 2024 – Sept 2024**

- Developed and evaluated Machine Learning solutions across Computer Vision and NLP, working with real-world datasets and end-to-end ML workflows.
- Built an end-to-end face classification system covering data preprocessing, model training, inference, and evaluation, using modular and maintainable pipeline design.

PROJECTS

KRUIT AI — AI RECRUITMENT PLATFORM

- Built an AI-powered recruitment platform that automates resume parsing, candidate screening, and recruitment workflows using LLM-based processing.
- Implemented an event-driven resume pipeline using Google Cloud Storage and Pub/Sub for document ingestion, parsing, and candidate creation.
- Developed bulk Excel candidate import and automated resume-request workflows through WhatsApp and email.
- Integrated LangGraph-based AI workflows with FastAPI and MongoDB to orchestrate candidate processing and recruitment operations.

SHIP BUILDING DIGITALIZATION PLATFORM

- Architected and developed a scalable backend for the ship design approval lifecycle, implementing role-based access control, multi-stage approval workflows, status tracking, and automated notifications.
- Designed and implemented REST APIs for departmental data exchange and approval operations, with optimized Frappe ORM queries to improve backend performance.
- Built automated report generation pipelines using Python, Pandas, and python-docx, replacing manual processes with standardized, structured reports for stakeholders.

FACE AUTHENTICATION SYSTEM

- Built a real-time face authentication system supporting 1:N recognition and 1:1 verification using Python and Computer Vision.
- Replaced brute-force matching with FAISS-based similarity search for improved scalability and query performance.
- Designed a modular detection, embedding, and matching pipeline with a Streamlit interface for real-time verification.

MULTIMODAL DOCUMENT CLASSIFICATION SYSTEM

- Built a document classification system combining image and text processing, achieving ~92% accuracy across diverse document categories.
- Integrated EasyOCR and custom preprocessing to extract and clean text from document images for classification.
- Optimized the pipeline with OCR caching and modular architecture, and deployed a Streamlit application with real-time classification and confidence scoring.

SKILLS

Languages : Python, SQL
Backend & Frameworks : FastAPI, Django, Frappe, Flask, REST APIs
ML & AI : scikit-learn, TensorFlow, PyTorch, OpenCV, FAISS, EasyOCR
Databases : MongoDB, MySQL, SQLite
Tools & Platforms : Git, Postman, Streamlit, Jupyter, VS Code, PyCharm,Google Cloud Storage, Google Pub/Sub
Concepts : REST API Design, Workflow Automation, ORM Optimization, Machine Learning, Computer Vision, Data Processing , CI/CD , Azure AI

EDUCATION

B.Tech in Computer Science Engineering
APJ Abdul Kalam Technological University
Thejus Engineering College, Thrissur, India
2019 – 2023

CERTIFICATIONS & LEARNING

Microsoft Certified : Azure AI Fundamentals (AI-900) — 2025
Python and Data Science with AI — ExpertzLab Technologies, 2023–2024
